

Since the very beginning we've had a clear philosophy at Genesis: build bikes we'd be proud to ride ourselves. That means everything we make, we love, and there's nothing here we've made just to tick some boxes. It's all killer, no filler if you will.

The other thing that underpins Genesis is a love for bikes that can do anything. We're proud to be the original adventure brand, and were making adventure bikes before adventure bikes were cool, because we know that no matter where you are or what you're trying to achieve, a bike is always your best travelling companion. We've stayed true to that through the years and as a result our bikes have been on all kinds of adventures, big and small, whether it's crossing entire continents, breaking records or simply figuring out where that lane that's been tempting you for years actually leads to.

So check out our new bikes, pick out your next two-wheeled companion and start planning an awesome 2020. Adventure is out there, you just need the right bike to find it.

MATERIALS

BLACK MAGIC & PRECIOUS METALS

We are not material snobs here at Genesis. We believe you can make brilliant bikes from steel, aluminium, carbon or titanium and that's exactly what we try to do. We are however, very particular about making sure that the materials we use are the very best available to us. Whether we are making frames with our own Mjolnir Chromoly, Reynolds 931 or 853 tubesets or even the stunning 3AL-2.5V double-butted Titanium, we choose the best materials for the job. That's the only way we can be sure the bike is as good as it can possibly be.

We're proud to say that Reynolds has played a major part in how our bikes and ranges have developed over time. For over ten years we've worked closely with their engineers to utilise beautiful and high-functioning tubesets that have made bikes like the Croix de Fer and Volare possible.

STEEL

CARBON

TITANIUM, CHROMOLY & ALUMINIUM

DESIGNED IN GREAT BRITAIN

"Drop bars don't always mean tarmac. 'Normal riding' shouldn't be a definition of accepted limits."

That's the description we gave the original Croix de Fer back in 2009. At the time, we weren't sure if people would get it, so we hedged slightly, labelling it as a cross bike in the truest sense of the word. Capable on and off road and with disc brakes, it was our take on a bike that could go further... but we never imagined quite how much further.

One year later Vin Cox set off from The Royal Observatory in Greenwich, London. Some 163 days and 18,000 miles later, he returned a world record breaker. The Croix de Fer was breaking records for us, too. It turns out people who love to ride bikes, loved the Croix de Fer.

A bike that is perfectly balanced with an appetite to take on the biggest adventures but with practicality at its heart. A cross-boundaries, cross-continent, 'cross-inspired kind of bike. Wherever you find yourself, there's fun to be had on a Croix De Fer. It's a bike we're hugely proud of here and one that's become synonymous with the Genesis brand.

The Original Croix De Fer - 2009

All your cycling needs covered

Make sure you've got the latest kit

Freewheel.co.uk is the official online stockist for Genesis bikes. Not only that, it has thousands of cycling products from bikes, helmets, apparel and computers to tools available online. Freewheel is a cycling website representing a nationwide network of independent bike shops, giving you access to all the latest kit from the biggest brands in cycling as well as expert advice, knowledge, aftersales service and advice. Simply choose to reserve & collect or get it delivered straight to your door. Either way every purchase benefits a local bike shop! It really is your local bike shop online. Freewheel.co.uk

CROIX DE FER

In many ways, the Croix de Fer is the original Genesis bike, the bike that best embodies who we are as a brand. The CdF can do a bit of everything, combining fun with practicality and is equally at home rolling down the tarmac as it is on a long adventure. When you're on a Croix de Fer the only limit is your imagination. There are no boundaries.

Everything you see on the next two pages is brand new for 2020 with small tweaks to spec and some very splendid new colourways. By popular demand we are also extremely pleased to be introducing the Croix de Fer 10 Flat Bar.

This is the category that defines Genesis, and a category that we had a big part in helping to form. We made gravel bikes before gravel bikes were cool, and have been making adventure bikes since the very first Genesis rolled out into the wild.

We've made bikes that have scaled the highest peaks, traversed continents, broken records and won races. With the award winning Datum, Fugio, Tour de Fer and the unforgettable Vagabond, we have a bike that'll suit you no matter how big – or wild - your off-road dreams are. Once again, the entire range is updated for 2020 and we have gone big on some of the new colourways. Just check out the two newlook Fugios! One area we have made significant changes is with the new Aluminium CDA 10 and 20, where we have hit a new, lower price-point to open adventure cycling up to a whole new audience.

R D 0

Although you might not always think road when you think Genesis, it's a category in which we have years of experience - capped off by winning the 2018 British National Road Race **championships.** But as you may have guessed, we're not content to follow the tarmac trends, and that's why steel and alloy underpin our road offerings with the beautiful Volare (now back in rim brake guise by popular demand), the ever-dependable Equilibrium and the Delta, a perfect starter bike for anyone who's a little road-curious. Oh, and we still have the Zero Disc SL, a pure-bred race weapon created for the Madison Genesis pro team and proud winner of that National Title.

Our 2020 range of road bikes is more refined than ever and we've included a number of stunning framesets, so riders can create their own dream builds. We can't wait to see them!

VOLARE DISC 931 FRAME

WE'VE HAD A **GREAT RIDE**

Who would have thought back in 2012, that an unknown team could go on to create so many incredible, lasting memories? It has been a privilege to watch some of the UK's top riders race our bikes to numerous memorable victories and the opportunity to pit ourselves against some of the biggest pro tour teams in the world has been something we will cherish forever.

Having national champion, Connor Swift, ride the Genesis Zero to victory in 2018 is certainly something we will never forget! Alas, all good things must come to an end and we'll be using our pro-peloton experience to keep improving and developing our bikes in the future. In the meantime, thank you to everyone that supported the team along this incredible journey. See you on the road.

U

Utility bikes make the world go round. They're the bikes that take you to the shops, get you to work and back and help you traverse the urban jungle free from the stress of driving. Ours are made to be practical and strong but have been injected with that little bit of style so you can ride around town with a smile on your face.

CYCLOCROSS

Cross is the ultimate blend of off-road skills and road riding fitness. It's tough and unforgiving on both rider and bike, so you're going to want to ride something you trust, and something that can take the punishment and come out wanting more. The Vapour has been refined through years of working with pro road riders and combining that with our own experience of making adventure bikes. Whether you choose the carbon or alloy version, it won't let you down when it counts.

When the snowy peaks or the dusty trails come calling, a real mountain bike is the only tool for the job. Our mountain bikes have been designed and tested on British trails and have all the fun, durability and outright quality you'll need to keep riding no matter what the weather brings.

We have really concentrated on focussing on our strengths with the new mountain bike range. The Tarn comes with brand new 12-speed SLX and we've created two beautiful framesets that we hope you love as much as we do.
